~CHILD'S DETAILS AND RECORDINGS~

1. Name of the patient: G.Takshith
Age: 9years 10 months
Parent's name: G.Sharmila
Address: G.Sanjay, H.No.908, Sainikpuri, Defence colony,
Sainikpuri-94
Phone No: **27114285, 9440249399**

Symptoms before treatment: The Patient was diagnosed with following sytoms :

1. Milk Autism
2. Tactile defensiveness (sensitive to touch, textures etc)
3. Obsessive, repetitive behaviors
4. Excessive and uncontrollable laughing behaviors.
5. Mischievous and naughty
6. Tends to have bouts of bronchitis-severe cough
7. Tends to have hyperacidity, cannot stand spicy food.

Recordings between 03.08.08 and 13.09.08:

Treatment: Started acupressure treatment for 2 minutes [maximum on each point] three times a day on point nos.1 to 6 [1-Brain, 2.Mental Nerves, 3.Pituitary gland, 4.Pineal gland 5.Head Nerves] 11 to 15, [Prostate gland, 12.Penis, 13.Vagina, 14.Uterus 15.Testes/ovaries] 25 Pancreas], 28[Adrenal gland] and 30 & 38[Lungs and Thymus gland].

Observations: Laughing behavior increased for few days, however settled soon. No more changes observed.

Recordings between 13.09.08 and 27.09.08:

1. Given acupressure treatment on each hand and sole for 5 minutes, or say total 20 minutes.
2. On 16 Sep started Aloe Vera 20ml mixed with honey once in a day in the morning with empty stomach. On the first day he had loose motions (3 times in a day) his appetite in slightly increased. Behavior usually normal but sometimes agitated and tensed.
3. On 19th Sep continuing aloe Vera once in a day started Canova- 5 drops and Brain fag-2 grains thrice a day. He had slight cough and cold. He was silent, moody and crying at times. Continued till 21st no marked difference in behavior. However cold and cough continued.

4. On 22nd Sep continuing the same medicines added black grape therapy. Remained moody and silent, cough and cold continued.
5. On 23rd Sep continuing the same medicine added health capsule once in a day. Cough and cold intensified, had slight fever and vomiting. Remained moody and cranky. Aggressive behavior seen which did exist hitherto. We had to start antibiotics and thereby decided to take a break from medicines. However acupressure was continued.

Recordings between 27.09.08 to 16.10.08

1. Continuing the medicines and black grape therapy.
2. Slight increase in laughing behavior. Tends to become moody and melancholic 40 min after taking medicines.
3. Doubts regarding Brain fag that it may cause disturbances. How long will it take to adjust? What is the composition and purpose of Brain fag?

Recordings between 16.10.08 to 2.11.08

1. Continuing with acupressure, medicines, massage of soles, blue light.
2. Has been given the small pill on 18th no noticeable change.
3. He is cranky sometimes.

Recordings between 3.11.08 to 21.11.08

1. Continuing with acupressure, medicines, massage of soles, blue light and charged water.
2. and moody resulting in crying behavior He is usually calm as before but becomes cranky which was not there in the recent past.

~CHILD'S DETAILS AND RECORDINGS~

Name of the patient: K.Sri Harsha

Age: 11 years

Parent's name: K.Lakshmi

Address: K.M.Varma, Plot No: 4-180/136, Saibaba Officers Colony, Sainikpuri, Secunderabad-94

Phone No: 65641839, 9247165760

Symptoms before treatment: Harsha was diagnosed with mild autism and ADHD.

1. He is very hyperactive
2. He had sensory problems.
3. Laughing and Crying behaviors in excess
4. Restlessness and sleep disorders.
5. Gastrointestinal problems.

Recordings between 03.08.08 and 13.09.08:

Treatment: Started acupressure treatment for 2 minutes [maximum on each point] three times a day on point nos.1 to 6 [1-Brain, 2.Mental Nerves, 3.Pituitary gland, 4.Pineal gland 5.Head Nerves] 11 to 15, [Prostate gland, 12.Penis, 13.Vagina, 14.Uterus 15.Testes/ovaries] 25 Pancreas], 28[Adrenal gland] and 30 & 38[Lungs and Thymus gland].

Observation: He was hyper for the first few days. He settled later. No marked improvement in other behaviors.

Recordings between 13.09.08 and 27.09.08:

1. Given acupressure treatment on each hand and sole for 5 minutes, or say total 20 minutes.
2. On 20th Sep started Aloe Vera 20ml mixed with honey once in a day (early morning empty stomach). First day he had loose motions, after that he was fine. He was laughing excessively for three days. His gastric problem aggravated. Now he has settled down. I found improvement in his skin texture.
3. On 21st Sep started giving blue light for 15 min once in a day on the head and spinal cord.
4. On 22nd Sep continuing aloe Vera, started Canova-10 drops and Brain fag-2 grains thrice a day. He was very restless and hyper for first two days. He had sleep disorders. Now he is settled.
5. On 25th Sep he was having mild fever, cough and cold, continuing the medicines, did not start the health capsules. Planning to start on 27th.

Recordings between 27.09.08 to 16.10.08:

1. On 27th continuing the medicines started health capsules thrice a day. No mark able changes in his behavior.
2. His sleep disorders have come down. His gastric problem has come down. I also found improvement in his skin tone.

Recordings between 16.10.08 to 2.11.08

1. Continued with acupressure, message of spine and soles, blue light and medicines (aloevera, canova drops and elixir three times a day)
2. On 19th of October he was given one small pill between 6:00 -7:00 p.m. He was hyper the next day but settled later.
3. His overall health has improved. Earlier if he catches a cold he has to be given antibiotics, but now it is coming down in one or two days without any antibiotics. His gastric problem has come down. His sleep has improved. I found improvement in his learning skills also; he started paying attention to what is happening around.

Recordings between 3.11.08-21.11.08

1. Continuing with acupressure, message of spine and soles, blue light and medicines (aloevera, canova, brainfag and elixir three times a day)
2. On 3rd Nov he was given one small pill between 6:00-7:00 p.m. He was hyper from the next day and is still hyper. His sleep is also disturbed now. I found improvement after starting the medicines but after giving the small pill it is like he has gone back.
3. His gastric problem has come down.

~CHILD'S DETAILS AND RECORDINGS~

Name of the patient: Kevin George

Age: 10 years

Parent's name: Lata George

Address: 26-85/1, Chanakyapuri, Safilguda

Phone No: 27242754, 9949168009

Symptoms before treatment: Kevin is diagnosed with developmental delay with mild autism. Other symptoms:

1. Stereotypical activity
2. Cannot digest fried or bakery food.
3. Constipation
4. Attention problem

Recordings between 03.08.08 and 13.09.08:

Treatment: Started acupressure treatment for 2 minutes [maximum on each point] three times a day on point nos.1 to 6 [1-Brain, 2.Mental Nerves, 3.Pituitary gland, 4.Pineal gland 5.Head Nerves] 11 to 15, [Prostate gland, 12.Penis, 13.Vagina, 14.Uterus 15.Testes/ovaries] 25 Pancreas], 28[Adrenal gland] and 30 & 38[Lungs and Thymus gland].

Observations: He was hyperactive for few days with aggravation of cold and cough. Now he is settled.

Recordings between 13.09.08 and 27.09.08:

1. Given acupressure treatment on each hand and sole for 5 minutes, or say total 20 minutes.
2. On 22nd Sep started Aloe Vera 20ml with honey once in a day (early morning empty stomach). He was hyper for few days. His cough and cold also aggravated.
3. On 26th Sep continuing aloe Vera. Did not start other medicines.

Recordings between 27.09.08 to 16.10.08:

1. Started charged water from 28.09.08
2. He has become hyper and he is getting constipated very often. I personally feel anything to do with vitamin-c such as orange juice and ayurvedic medicine like triphala which was earlier given for constipation, did not serve the purpose.
3. Started giving blue light from 4.10.08

Recordings between 16.10.08 to 2.11.08

1. Stopped charged water since he was hyper and was getting constipated.
2. Stopped Elixir due to constipation.
3. Giving medicine only twice.
4. Constipation and hyperactivity has come down.
5. Acupressure and blue light is continued.

Recordings between 3.11.08 to 21.11.08

1. Continuing Acupressure, blue light started Elixir once a day Aloe vera twice a day, he was doing fine but once I increased the dose of Elixir and gave charge water he got severe constipation .
2. Behaviour has completely deteriorated he started biting, pinching others.

~CHILD'S DETAILS AND RECORDINGS~

Name of the patient: Mohit

Age: 10 years

Parent's name: P.Yamini

Address: H.No.1-7/208, GFD, S.S.Enclave, Kamala Nagar, ECIL X Roads

Phone No: 27121884, 9949354945

Dreadful Diseases [all systems failed] being treated by Dr.Dhananjaya Bhupathi,M.D.,A.M., from 16112008 under guidance of Dr.Devendra Vora and Dr.Jinukala Narayana Rao

1.Name of the Patient: Master K.Madhusudhan, 12 years - Male. S/O.Shri K.Latchaiah, P.O. KARNALAPALLY – 502255, Chegunta Mandal, Medak District. Andhra Pradesh, India. MOBILE NO. 9441989181.

2.Diagnosed as Suffering Muscular Dystrophy –

3.Signs and Symptoms:

A Muscle disorder of unknown cause with slow degeneration of muscle fibres. Serum creatine kinase estimation, quantitative electromyography, muscles- biopsy and their presence cautions against producing children. Lest their children may also contract the condition through genes which is 50:50. The patient's sisters may be sterilized and encouraged to adopt children.

Spastic Ataxia – incoordination of gait and balance and is caused due to damage to cerebellum and the spinal cord. The typical ataxia IS WHEN GAIT IS LURCHING AND UNSTEADY AND WALKING PERSON HAS A TENDENCY TO FALL ON THE AFFECTED SIDE. He/She may overshoot while picking the fallen objects.

In this case, abnormal stiffness and contractions of muscles is noted. Muscles become hypotonic. More so, muscles in thighs and ankles are stiff, bulged with complete flat feet. He was brought to my clinic by carrying by his father. The child had viral fever @ age of 8 years and the impact was slowly affecting nervous system, brain, spinal cord, muscular as well as skeletal systems. Haemoglobin was 17.5. Can't get up from sitting posture on the ground. Some sort of support is required.

16112008: Treatment commenced as per Dr.Devendra Vora's stipulated instructions + gave aloe vera juice – 30 ml. t.d.s. wheat grass powder – 1 tsp + few drops of honey b.d.s., and Canova Drops-10 drops sublingual t.d.s., Elixir Capsules 2 t.d.s.

16122008 : Walking/gait improved to walk with support for short distances.

16012009 : Muscles in thighs, ankles and feet toned up, excess muscle fibre dissolved, flat feet became topsy-turvy with natural curves and patient could walk for half-a-kilometer with parental support.

15042009 : After identifying the acu points, 1 to 16 & 37—commenced treatment for HIV including urine therapy. The result is very excellent as on today – 06052009. The child became still more healthy and looks very handsome with glowing body structure. By looking at the patient, nobody knows/grasps that he suffered from muscular dystrophy. The only residual problem is that the child can't get up from sitting posture, on the ground, independently. Once he can get up independently of his own accord, he can go to school outside his village.

In this connection, it is not out of place to mention that Dr.Jinukala Narayana Rao, MBBS.,D.D., after examining the patient in January,2009 prescribed two allopathic drugs, namely Simrose and Nurokind.

One each either in the morning or evening only. Continued since then and the results are more pronounced. Hats off to Dr.Jinukala Narayana Rao.

How ever, after review on 04062009, he was advised to attend the school in a nearby village with the escort of his elder sister. Besides continuing the regular treatment, he was further advised, by Dr.Jinukala Narayana Rao, to take Noni fruit extract and a magnetic belt was fixed on his back.

Long live Dr.Devendra Vora full 120 years given by Him.

Name of the Ailment --- WILMS' TUMOUR – It is a nephro-blastoma which occurs in children. It is highly malignant tumour- it occurs prior to the age of 4. In the absence of any pain, it may come out in the form hematuria. Nephrectomy may relieve the problem.

Name of Patient: Master M.Omprakash, 8 years., Male, Warangal – Mobile No.91773 58344.
Mother Smt.Kala

Complaint of haematuria started 3 years ago and tumour mass removed by surgical interference in 2007. Right hypochondriac region becomes stiff and can't afford another surgery; due to poverty.

Treatment Schedule:

All stipulated instructions of Dr.Vora + Canova drops, elixir caps, aloe vera juice and wheat grass powder,Immuno drops.

28082009: Patient is free from any pain and treatment continued.

15092009: Patient recovered and resumed to his studies.

Dreadful Diseases treated by Dr.Dhananjaya Bhupathi, M.D.[A.M.] as per guidelines given by Dr.Devendra Vora, the pioneer in acupressure in India, vide his book 'Health in Ur Hands'.

Name of the patient, Age and Sex: Shri A. V , 69 years, Male, Warangal-506002.

Name of Disease: Parkinson's Syndrome - Parkinsonism (also known as Parkinson's syndrome, atypical Parkinson's, or secondary Parkinson's) is a neurological [syndrome](#) characterized by [tremor](#), [hypokinesia](#), [rigidity](#), and [postural instability](#). He had the fear of death.

Date of commencement of treatment- 15032009.

Treatment Schedule - Acupressure techniques to set right the functioning all internal organs, endocrine glands, Gold, silver, copper and iron charged water [8 glasses reduced to 2 glasses], setting right the solar plexus, Elixir and anti-oxidant capsules - amrit drops, MP 3x and KP-3x.

28042009: involuntary shaking of hands reduced and gave simrose tabs + nurokind tabs., 1 each daily and continued the above treatment schedule, as per suggestions of Dr.Jinukala Narayana Rao, MBBS., DVD.,.

Also commenced treatment for Amoebiasis, Vertigo. - tissue salt remedies.

Dysentery - tissue salt remedies.

Aloe Vera Juice - 30 ml. + 1 tsp of honey t.d.s.

25052009: Parkinson's Syndrome reduced 95% with some traces left over and vertigo and dysentery under control.

Further treatment as above is continued.

28082009: Patient is keeping well. Involuntary shaking/trembling of hands and legs reduced. Patient gets the attack for short spells of a few minutes; depending upon bouts of periodic tensions. Over all improvement of health noticed.

Psycho-therapy helped the patient to live with full self-confidence. Fear of death vanished for the present.

Name of the patient: Master T.Srujan Reddy

Father's Name & Place: Mr.T.Show Reddy, Reddy Colony, Hanamkonda, Warangal, A.P.

Age & Sex: 14 years Male.

Mobile No. 09392236158

Diagnosed as: Muscular Dystrophy

Date of commencement of treatment: 09082009/11102009

Signs & Symptoms:

A Muscle disorder of unknown cause with slow degeneration of muscle fibres. Serum creatine kinase estimation, quantitative electromyography, muscles- biopsy and their presence cautions against producing children. Lest their children may also contract the condition through genes which is 50:50. The patient's sisters may be sterilized and encouraged to adopt children.

Spastic Ataxia – in-coordination of gait and balance and is caused due to damage to cerebellum and the spinal cord. The typical ataxia IS WHEN GAIT IS LURCHING AND UNSTEADY AND WALKING PERSON HAS A TENDENCY TO FALL ON THE AFFECTED SIDE. He/ She may overshoot while picking the fallen objects.

In this case, abnormal stiffness and contractions of muscles is noted. Muscles become hypotonic. More so, muscles in thighs, calf muscles and ankles are stiff, bulged with Flat feet, severe sprain in the right foot, first attack in 2005. Went to school upto 2005 and after attack, stopped school going.

Histopathology Report conducted on 26122007 @ NIZAM'S INSTITUTE OF MEDICAL SCIENCES, PUNJAGUTTA, HYDERABAD.

Microscopic Description:

Muscle Biopsy shows effaced fascicular Muscle Architectures. There is marked variation in fibre size seen. There are atrophic, hypertrophic and rounded fibres. There is fibre splitting seen along with internalization of nuclei seen. There is myophagocytosis seen. Inflammation is absent. Interfascicular tissue is showing marked prominence of adipose tissue and fibrosis. ATPase 9.4 and 4.6 shows pseudogrouping of fibres. MGT is not showing red ragged fibres. Masson's Trichrome is showing interstitial fibrosis. NADH and SDH are unremarkable.

Impression: Features are consistent with Muscular Dystrophy. Advised IHC with dystrophin Sarcoglycans and dysferlin.

Sd/-

Prof. C.Sundaram.

Tender Acu points noted on 09082009 - 1 to 16, 37. Severe pain in calf muscles on 09082009 noted. Patient was literally carried by two persons to the clinic. Patient was very much under depression. Patient is anaemic.

Treatment Schedule: Aloe vera juice, wheat grass powder, canova/anbuta drops, amrith drops, herbal snuff to remove brain fag, if any, hormonal balance tabs., Nurokind and simrose tabs, Black Grapes Therapy.

On 25102009, the boy fell on his back with severe back-ache. X-ray of Lumbar Spine – AP. and Lateral view revealed no fracture.

On 27102009, it was noted that his calf muscles became soft.

Further treatment suggested was Derma-P local application and Sprain Mixture to reduce pain in the right foot and lumbar region.

22112009: Severe back-ache is completely brought down; but the pain shifted from lumbar region to Calf muscles. More over, all the stiff muscles started to become soft.

To balance his gait, the patient is stretching his legs wider and struggling to move with severe efforts. Morale of the patient improved considerably.

Further treatment—health capsules, anti-oxidant capsules, wheat grass, aloe vera juice, canova drops, aurum met., brain fag, Neurokind, Simrose, Derma-P, hormonal bal tabs., solar plexus pump to set right disturbed solar plexus, Magnetic belt for lumbar region fixed, thumb acupressure, Acu power mat, silver, copper charged water + gold drops, blue light application on brain and spinal cord, yoga exercises, etc.,

25112009: Rt. Calf muscle painful and left calf muscle is without pain. It has become a bit easier to climb steps unlike the past.

20122009: Slight improvement in gait as informed by the patient. Steady decrease in Lurching gait noted.

15012010: The patient confirmed 'Not falling more frequently unlike the past Right foot developed natural and healthy curvatures [topsy-turvy shapes]; bulged & tough muscles toned -up and patient became slim and excess muscle fibre dissolved and the patient lost some weight. 'Looks more handsome and healthy.'

Treatment: Repeating the treatment schedule added Panacea tabs., High Power Magnets – 500 gauss on soles and palms for 30 minutes daily.

On 01022010, Dr.J.Narayana Rao, MBBS.,DD., examined the patient and noted toned-up muscles and the patient lost weight and patient has become self-confident with every hope to recover. Left foot is also becoming topsy-turvy with natural curves. Prescribed Noni juice, Nurokind, Reklaf and Simrose.

15022010—Patient told that he is getting dreams that he has become quite normal and walking as usual. It is a good omen.

04032010—Patient is confident to climb steps without the fear of falling. By standing straight with the support of Magnetic belt, he looks taller than his father and to deal with muscle atrophy,

24032010—Additional treatment introduced- Aconite, Lathyrus, Helo and Bonache, homoeo and herbal medications.

30032010--Multi massager to render sufficient activation of acu-points in both palms, soles and Lower limbs.No remissions and no falling. Swift walking noticed and horizontal straightening of lower limbs reduced significantly. Atrophy medication [tissue salt remedies], Panacea, what grass powder, canova drops, hormonal balancing tas, amrith powder.

24042010—curvature of the spinal cord reduced significantly with straight posture in walking, improvements in gait noticed.Nurokind-1 daily, Reklaf-1 t.d.s., Simrose-1000 – 1 daily and Noni juice added to the existing line of treatment as cited.

29092010:The patient continued medication and started attending the same school; which he could not attend for the past 2 years due to illness and remissions.

18012011: As per suggestions of Dr.Vora the patient is pressing his both thumb and big toes to activate Pituitary and Pineal glands and other parts of brain; using Spine activator regularly, and applying Super Power Magnets on both soles for 30 minutes daily from 16122010.

25012011:Further improvements in his gait are noticed. Not stretching his legs much and no falls at all, while walking.

Name of the Patient: Master Sai Tejaswi – IX class discontinued in 2010 due to DMD.

Age: 14 yrs **Sex:** Male

Father's Name: Shri B.Srinivas, Engineer, RAMCO, Hyderabad. Telephone Nos.04065551851, 09676450555. **Mother Smt. Radhika.** Her younger brother affected by DMD and lived for 27 years only. He is the only issue to this couple.

Date of commencement of treatment: 03022011.

Diagnosed as: Duchenne's Muscular Dystrophy.

Tender Acu points—No.1-10, 11-16, 37. Solar plexus disturbed. Eye sight affected and wearing specs.

Brief History: Normal birth and all the mile stones were normal upto 3rd year. On completing 3rd year, he had frequent high fever of 104 degrees Fahrenheit and was treated by antibiotics and broad spectrum drugs. His bodily changes were noted from 3rd year onwards the remissions became very severe by 2009-2010. Fingers in hands, legs getting frozen with visible deformities. Waning of muscles and flat feet noticed.

Present Position: Bulged muscles, stiffness noted, odema of face and joints, wearing specs, with intelligence acumen intact. He is a genius by scoring 99% in most of the subjects until he passed IX class last year. By the grace of God, the patient's intelligence acumen were not affected so far. However, the patient vis-a-vis his mother Mrs.Radhika were under depression; when the patient was brought to our clinic all the way from Hyderabad by car/wheel chair. He has two plus points. A committed Goddess in the form of mother [Smt.Radhika] and unaffected mental acumen.

We suggested strict diet restrictions for stopping further remissions and recovery process to commence early. **Details of Treatment:**

Psychotherapy given to both the patient and his mother to boost-up their morale. Dr.Jinukala Narayana Rao, MBBS., DD., member of Medical advisory board, SAIOAM trust prescribed 1.Nurokind+ --Dosage 1 tablet daily; 2. Simrose-500. Dosage—1 bd.s.; 3. Rekfa – Dosage 1 td.s.

Noni juice, aloe vera juice, wheat grass powder, Q-drops, Herbal snuff, Derma-P Medicaed oil, Hormonal balancing globules, Panacea tablets, Elixir caps, Anti-oxidant caps, Black grapes [to tackle anaemia], Olive oil to apply on the entire body, Spine activator, Blue/Red light[s], Vaporizer, Pranayam, Kapalbhati, Bastrika, etc.

Smt.Radhika, Patient's mother thanked Dr.J.Narayana Rao and all the members of the Advisory Board and Mr.N.Yadagiri, Managing Trustee of SAIOAM trust for their yeomen's service.

Name of the Patient: Miss A.C.Lahari,

Age: 10 yrs Sex:Female

Father's Name:Shri Madhukar Mobile No.9032890525

Diagnosed as: Muscular Dystrophy & Autism

Date of commencement of treatment: 26122009.

Signs & Symptoms:

A Muscle disorder of unknown cause with slow degeneration of muscle fibres. Serum creatine kinase estimation, quantitative electromyography, muscles- biopsy and their presence cautions against producing children. Lest their children may also contract the condition through genes which is 50:50. The patient's sisters may be sterilized and encouraged to adopt children.

Spastic Ataxia – in-coordination of gait and balance and is caused due to damage to cerebellum and the spinal cord. The typical ataxia IS WHEN GAIT IS LURCHING AND UNSTEADY AND WALKING PERSON HAS A TENDENCY TO FALL ON THE AFFECTED SIDE. He/ She may overshoot while picking the fallen objects.

In this case, abnormal stiffness and contractions of muscles is noted. Muscles become hypotonic. More so, muscles in thighs, calf muscles and ankles are stiff, bulged with Flat feet, severe sprain in the right foot, first attack in 2005. Went to school upto 2005 and after attack, stopped school going.

Acu Points Tender in 1 to 16 and 37

For this child, head injured after delivery by accidental fall. Mental acumen satisfactory.

Treatment Suggested: Spine Activator, Aloe Vera, KP-3x, AurumMet, Canoa Drops, Amrit Drops/Powder.

On 19012010 her grand mother visited our clinic @ Hanamkonda and expressed her happiness with progress & positive response of the patient to acupressure treatment.

On 01022010nDr.J.Narayana Rao, MBBS., DD., examined the patient and noted improvements in the skin texture of the child and improvement in the healthy glow of the patient. Patient's response has improved and salivary secretions regulated. Oozing salivary secretions stopped totally.

Noni Juice and Nerokind injections are prescribed.
